Subject Index of Volume 45

Abrasion
fully computerized sclero-topometer for simulations and modelling of abrasive wear, 33
Alumina
microscopic aspects of copper, zirconium and iron ion implantation in alumina, 23
morphological study of an alumina–glass coating, 209
Aluminium
hard coatings in the system (Ti, Al) (C, N) prepared by pyrolysis of polymeric precursor films, 99
mechanical properties of Cu/Al multilayered thin films, 215
properties of arc-evaporated CrN and (Cr, Al)N coatings, 53
Arc evaporation
properties of arc-evaporated CrN and (Cr, Al)N coatings, 53
Austenite
real structure of near-surface regions in austenite single crystals after implantation with 30 keV N^+ ions studied by synchrotron radiation under grazing incidence conditions, 221

Biocompatibility
corrosion protection of metal implants by sputter-deposited biocompatible ceramic coatings, 129
Bonding
interface phenomena and bonding mechanism of thermally-sprayed metal and ceramic composites, 299
Boron nitride
computer simulation of boron nitride deposition by ion-beam-assisted evaporation, 73

Cadmium chalcogenide
structural and semiconducting characteristics of electrodeposited calcium chalcogenide thin films, 273
Calcium phosphate
calcium phosphate coatings for orthopaedic prosthesis, 171
Carbides
hard coatings in the system (Ti, Al) (C, N) prepared by pyrolysis of polymeric precursor films, 99
Carbonitrides
effects of xenon bombardment on the dissolution and reprecipitation of carbonitrides produced in nitrogen-implanted low carbon steel, 255
Carbonized layers
influence of the deposition gas on the properties of plasma-deposited carbonized layers, 353
Ceramics
ceramic coatings and laser treatment, 245
characterization of ceramic coatings by photothermal radiometry, 325
CF_4
plasma polymerization of $CF_4 + H_2$ mixtures on the surface of polyethylene and polyvinylidene fluoride substrates, 369
Characterization
overview of the characterization methods of the growth mechanisms of low pressure diamond, 343
Chemical composition
study of the chemical composition of silicon nitride films obtained by chemical vapour deposition and plasma-enhanced chemical vapour deposition, 137
Chromium
corrosion resistance of Fe–Ni–Cr laser surface alloys, 449
effect of YCl_3 addition on chromium pack diffusion type coating of an Ni–Co–ThO_2 composite material, 179
induction brazing of diamond with Ni–Cr hardfacing alloy under argon atmosphere, 293

Chromium (*Continued*)
properties of arc-evaporated CrN and (Cr, Al)N coatings, 53
Chromium nitride
structure and mechanical properties of reactively sputtered chromium nitrides, 59
CO_2 laser
CO_2-laser-induced chemical vapour deposition of TiB_2, 105
remelting of surface coatings on steel by CO_2 laser radiation, 409
Composites
interface phenomena and bonding mechanism of thermally-sprayed metal and ceramic composites, 299
Computer simulation
computer simulation of boron nitride deposition by ion-beam-assisted evaporation, 73
Copper
mechanical properties of Cu/Al multilayered thin films, 215
microscopic aspects of copper, zirconium and iron ion implantation in alumina, 23
Corrosion
corrosion of sputtered titanium nitride films deposited on iron and stainless steel, 115
corrosion protection of metal implants by sputter-deposited biocompatible ceramic coatings, 129
corrosion resistance of Fe–Ni–Cr laser surface alloys, 449
Cr_7C_3 coatings
residual stresses analyses of metallo-organic chemically vapour-deposited Cr_7C_3 coatings on SAE 4135 steel substrates, 185
CrB_2 particles
laser surface alloying of carbon steel and α-Fe with CrB_2 particles, 417
Crystalline orientation
influence of pulse reversed current technique on the crystalline orientation and surface morphology of nickel electrodeposits, 155

Deposition gas
influence of the deposition gas on the properties of plasma-deposited carbonized layers, 353
Diamond
induction brazing of diamond with Ni–Cr hardfacing alloy under argon atmosphere, 293
overview of the characterization methods of the growth mechanisms of low pressure diamond, 343
Diamond-like carbon
hard diamond-like carbon films prepared by various physical vapour deposition techniques, 359

Electronic structure
electronic structure investigation at a zirconia–nickel interface, 309

Fracture
interfacial fracture toughness of vacuum-plasma-sprayed coatings, 333
Fretting
fretting wear of carbon-ion-implanted physical-vapour-deposited TiN coatings, 89
Friction
effects of ion implantation on titanium alloys polyethylene and 316L stainless steel/polyethylene friction couples running in joint prostheses, 15

Glancing angle X-ray diffraction
characterization by glancing angle X-ray diffraction of the interface between austenitic stainless steel AISI 304 substrates and a TiN or Ti/TiN physical vapour deposition coating, 193
Glass
morphological study of an alumina–glass coating, 209
Growth mechanisms
overview of the characterization methods of the growth mechanisms of low pressure diamond, 343

Hard carbon
implantation-assisted deposition of hard carbon coatings on steel substrates, 379
Hard coatings
hard coatings for tribological applications: a pluridisciplinary approach, 1
hard coatings in the system (Ti, Al)(C, N) prepared by pyrolysis of polymeric precursor films, 99

Hydrogen
plasma polymerization of $CF_4 + H_2$ mixtures on the surface of polyethylene and polyvinylidene fluoride substrates, 369

Incoloy 800H
deposition of silica coatings on Incoloy 800H substrates using a high power laser, 425
Induction brazing
induction brazing of diamond with Ni–Cr hardfacing alloy under argon atmosphere, 293
Interface phenomena
interface phenomena and bonding mechanism of thermally-sprayed metal and ceramic composites, 299
Intermediate layer
influence of an intermediate layer on the residual stress field in a laser clad, 435
Ion bombardment
modification of surfaces of polymers by ion bombardment for improvement of mechanical properties, 229
Ion implantation
effect of ion implantation on titanium alloys polyethylene and 316L stainless steel/polyethylene friction couples running in joint prostheses, 15
implantation-assisted deposition of hard carbon coatings on steel substrates, 379
low friction molybdenum surfaces produced by ion implantation of sulphur ions, 9
Iron
corrosion of sputtered titanium nitride films deposited on iron and stainless steel, 115
corrosion resistance of Fe–Ni–Cr laser surface alloys, 449
laser surface alloying of carbon steel and α-Fe with CrB_2 particles, 417
microscopic aspects of copper, zirconium and iron ion implantation in alumina, 23

Laser clad
influence of an intermediate layer on the residual stress field in a laser clad, 435
Laser irradiation
morphological modification of TiC by laser irradiation, 393
Laser melting
laser melting of plasma-nitrided steel samples, 399
Laser surface alloy
corrosion resistance of Fe–Ni–Cr laser surface alloys, 449
laser surface alloying of steel with TiC, 403
laser surface alloying of carbon steel and α-Fe with CrB_2 particles, 417
laser surface alloying using metal salt precursors, 443
Laser treatment
ceramic coatings and laser treatment, 245

Magnetoresistance
resistivity and magnetoresistance of monocrystalline $TaSi_2$ and VSi_2, 237
Mechanical properties
mechanical properties of Cu/Al multilayered thin films, 215
structure and mechanical properties of reactively sputtered chromium nitrides, 59
Metal implants
corrosion protection of metal implants by sputter-deposited biocompatible ceramic coatings, 129
Metal salt precursors
laser surface alloying using metal salt precursors, 443
Modification
modification of properties of TiB_2 coatings by ion beam mixing during deposition, 83
modification of surfaces of polymers by ion bombardment for improvement of mechanical properties, 229
Molybdenum
low friction molybdenum surfaces produced by ion implantation of sulphur ions, 9
Morphology
morphological modification of TiC by laser irradiation, 393
morphological study of an alumina–glass coating, 209

Near-surface regions
real structure of near-surface regions in austenite single crystals after implantation with 30 keV N^+ ions studied by synchrotron radiation

Near-surface regions (*Continued*)
under grazing incidence conditions, 221
Neon implantation
x-ray stress analysis of neon implantation in laser-treated 304 stainless steel, 43
Ni–Co–ThO_2 composite
effect of YCl_3 addition on chromium pack diffusion type coating of an Ni–Co–ThO_2 composite material, 179
Nickel
corrosion resistance of Fe–Ni–Cr laser surface alloys, 449
electronic structure investigation at a zirconia–nickel interface, 309
induction brazing of diamond with Ni–Cr hardfacing alloy under argon atmosphere, 293
influence of pulse reversed current technique on the crystalline orientation and surface morphology of nickel electrodeposits, 155
plating of nickel–phosphorus multilayer alloys: current pulse effects on the microstructal and mechanical properties, 161
Nitrides
hard coatings in the system (Ti, Al) (C, N) prepared by pyrolysis of polymeric precursor films, 99
properties of arc-evaporated CrN and (Cr, Al)N coatings, 53
Nitriding
plasms process for thermodiffusional titanium nitriding, 201

Pack diffusion
effect of YCl_3 addition on chromium pack diffusion type coating of an Ni–Co–ThO_2 composite material, 179
Phosphorus
plating of nickel–phosphorus multilayer alloys: current pulse effects on the microstructal and mechanical properties, 161
Photothermal radiometry
characterization of ceramic coatings by photothermal radiometry, 325
Plasma polymerization
plasma polymerization of $CF_4 + H_2$ mixtures on the surface of polyethylene and polyvinylidene fluoride substrates, 369
Plasma-sprayed coatings
a novel shear test for plasma-sprayed coatings, 317
interfacial fracture toughness of vacuum-plasma-sprayed coatings, 333
Plating
plating of nickel–phosphorus multilayer alloys: current pulse effects on the microstructural and mechanical properties, 161
Polyethylene
effect of ion implantation on titanium alloys polyethylene and 316L stainless steel/polyethylene friction couples running in joint prostheses, 15
Polymers
modification of surfaces of polymers by ion bombardment for improvement of mechanical properties, 229
Pulsed ion beams
high intensity pulsed ion beams in the surface modification of solids—experiments carried out in Poland, 385
Pyrolysis
hard coatings in the system (Ti, Al) (C, N) prepared by pyrolysis of polymeric precursor films, 99

Remelting
remelting of surface coatings on steel by CO_2 laser radiation, 409
Resistivity
resistivity and magnetoresistance of monocrystalline $TaSi_2$ and VSi_2, 237
Reversed current
influence of pulse reversed current technique on the crystalline orientation and surface morphology of nickel electrodeposits, 155

Sclero-topometer
fully computerized sclero-topometer for simulations and modelling of abrasive wear, 33
Semiconductivity
structural and semiconducting characteristics of electrodeposited calcium chalcogenide thin films, 273
Shaft restoration
tribological behaviour of sprayed coatings for shaft restoration, 263

Shear
a novel shear test for plasma-sprayed coatings, 317
Silica
deposition of silica coatings on Incoloy 800H substrates using a high power laser, 425
Silicon
structure and properties of $TiSi_2$ thin films and $TiSi_2$–Si(111) interfaces, 281
Silicon nitride
study of the chemical composition of silicon nitride films obtained by chemical vapour deposition and plasma-enhanced chemical vapour deposition, 137
transformation of silicon nitride in oxygen plasma, 147
Sprayed coatings
tribological behaviour of sprayed coatings for shaft restoration, 263
Stainless steel
characterization by glancing angle X-ray diffraction of the interface between austenitic stainless steel AISI 304 substrates and a TiN or Ti/TiN physical vapour deposition coating, 193
characterization of plasma-sprayed titanium coatings on stainless steel, 121
corrosion of sputtered titanium nitride films deposited on iron and stainless steel, 115
effect of ion implantation on titanium alloys of polyethylene and 316L stainless steel/polyethylene friction couples running in joint prostheses, 15
x-ray stress analysis of neon implantation in laser-treated 304 stainless steel, 43
Steel
effects of xenon bombardment on the dissolution and reprecipitation of carbonitrides produced in nitrogen-implanted low carbon steel, 255
implantation-assisted deposition of hard carbon coatings on steel substrates, 379
laser melting of plasma-nitride steel samples, 399
laser surface alloying of steel with TiC, 403
laser surface alloying of carbon steel and α-Fe with CrB_2 particles, 417
remelting of surface coatings on steel by CO_2 laser radiation, 409
residual stresses analyses of metallo-organic chemically vapour-deposited Cr_7C_3 coatings on SAE 4135 steel substrates, 185
Stress
influence of an intermediate layer on the residual stress field in a laser clad, 435
residual stresses analyses of metallo-organic chemically vapour-deposited Cr_7C_3 coatings on SAE 4135 steel substrates, 185
x-ray stress analysis of neon implantation in laser-treated 304 stainless steel, 43
Structure
real structure of near-surface regions in austenite single crystals after implantation with 30 keV N^+ ions studied by synchrotron radiation under grazing incidence conditions, 221
structural and semiconducting characteristics of electro-deposited calcium chalcogenide thin films, 273
structure and mechanical properties of reactively sputtered chromium nitrides, 59
structure and properties of $TiSi_2$ thin films and $TiSi_2$–Si(111) interfaces, 281
structure characterization of plasma-deposited TiN coatings, 67
Sulphur
low friction molybdenum surfaces produced by ion implantation of sulphur ions, 9
Surface modification
high intensity pulsed ion beams in the surface modification of solids—experiments carried out in Poland, 385
Surface morphology
influence of pulse reversed current technique on the crystalline orientation and surface morphology of nickel electrodeposits, 155
$TaSi_2$
resistivity and magnetoresistance of monocrystalline $TaSi_2$ and VSi_2, 237

Thermodiffusion
plasma process for thermodiffusional titanium nitriding, 201
Titanium
characterization by glancing angle X-ray diffraction of the interface between austenitic stainless steel AISI 304 substrates and a TiN or Ti/TiN physical vapour deposition coating, 193
characterization of plasma-sprayed titanium coatings on stainless steel, 121
CO_2-laser-induced chemical vapour deposition of TiB_2, 105
corrosion of sputtered titanium nitride films deposited on iron and stainless steel, 115
effect of ion implantation on titanium alloys polyethylene and 316L stainless steel/polyethylene friction couples running in joint prostheses, 15
fretting wear of carbon-ion-implanted physical-vapour-deposited TiN coatings, 89
hard coatings in the system (Ti, Al) (C, N) prepared by pyrolysis of polymeric precursor films, 99
laser surface alloying of steel with TiC, 403
modification of properties of TiB_2 coatings by ion beam mixing during deposition, 83
morphological modification of TiC by laser irradiation, 393
plasma process for thermodiffusional titanium nitriding, 201
structure and properties of $TiSi_2$ thin films and $TiSi_2$–Si(111) interfaces, 281
structure characterization of plasma-deposited TiN coatings, 67
Transformation
transformation of silicon nitride in oxygen plasma, 147
Tribology
hard coatings for tribological applications: a pluridisciplinary approach, 1
tribological behaviour of sprayed coatings for shaft restoration, 263

VSi_2
resistivity and magnetoresistance of monocrystalline $TaSi_2$ and VSi_2, 237

Xenon
effects of xenon bombardment on the dissolution and reprecipitation of carbonitrides produced in nitrogen-implanted low carbon steel, 255

Yttrium chloride
effects of YCl_3 addition on chromium pack diffusion type coating of an Ni–Co–ThO_2 composite material, 179

Zirconia
electronic structure investigation at a zirconia–nickel interface, 309
microscopic aspects of copper, zirconium and iron ion implantation in alumina, 23
